HS Codes

European HS codes versus Canadian HS codes

The main difference between HS codes in Europe and Canada lies in the additional digits. The first six digits are harmonized globally

- The Harmonized schedule Canadian Customs Tariff
- The Integrated Tariff of the European Union (TARIC)

See link to Canada and European resources for HS lookup: [👉 Jet's blog on HS Codes](#)

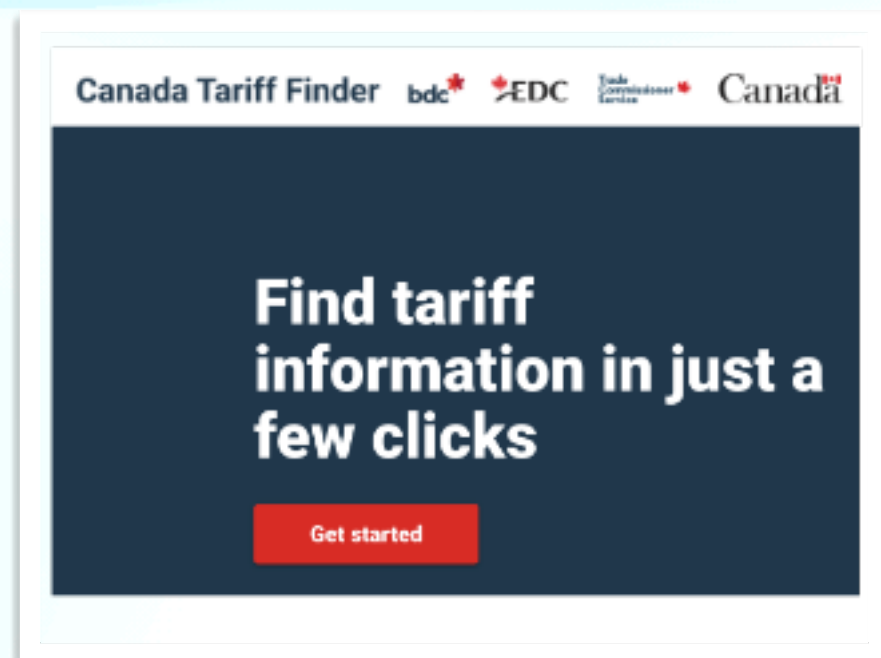

Shipping to Canada from France

HS Codes

In addition to European online resources, you can find the Canadian HS codes via Canada Export Development Corporation's online tool.

HS Codes

Generic Harmonized System (GHS) to Canada

Canada has a tariff classification process for qualified postal and courier imports. The system may be used in lieu of a more detailed classification. This a great benefit for e-commerce imports.

This gives the option to apply one of three generic Most-Favoured-Nation (MFN) tariff rates. Assessment on “special classification provisions” found in Chapter 98 of Canada’s Customs Tariff.

Tariff Item	MFN Tariff	Preferential Tariff Treatment
9825.10.00	20%	e.g. UST/MT/ CT - Free
9825.20.00	8%	e.g. UST/MT/ CT - Free
9825.30.00	0%	e.g. UST/MT/ CT - Free

Valuation / Value For Duty

Transaction Value

In the majority of the cases, the correct value to declare at export and import is the “transaction value.” The transaction value is the price paid - or payable - for the goods.

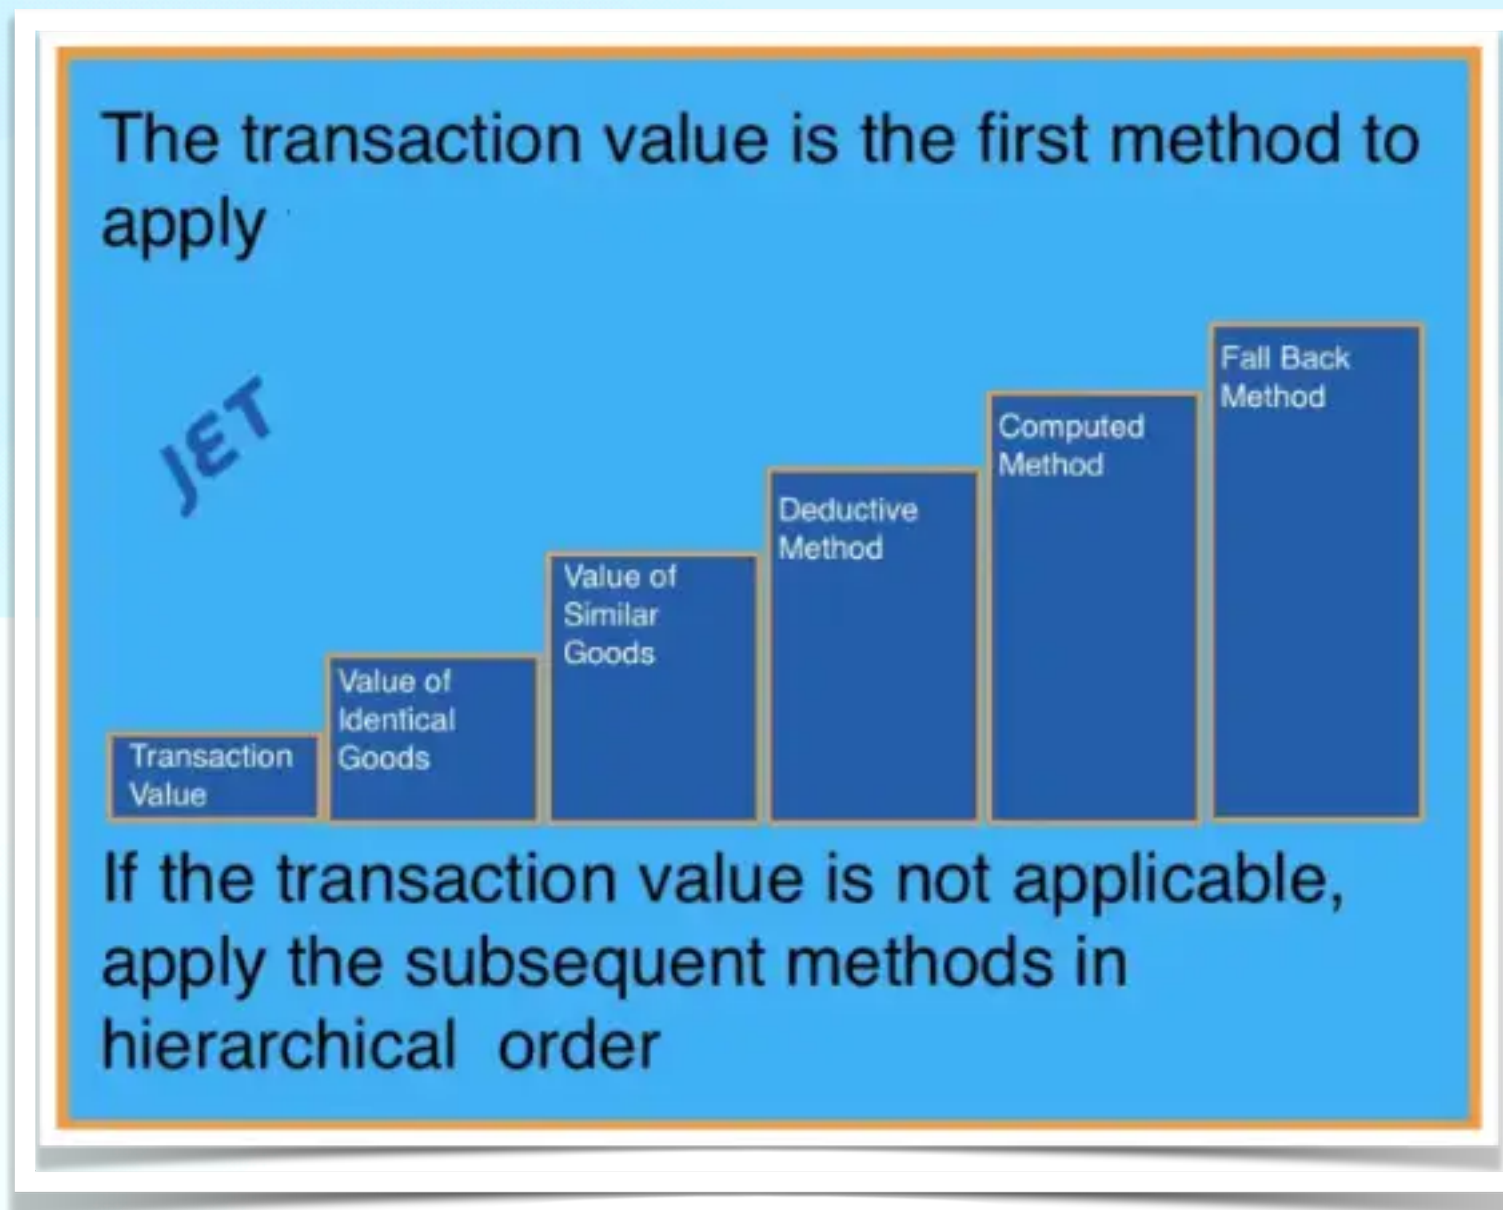

Customs considers the cost shipping and insurance as part of the transaction value (known as CIF value).

Shipping to Canada from France

Country of Origin

Just the purchase and shipping an item from Europe does not grant duty free status to Canada

Shipping from Europe ≠ European origin goods

To benefit from preferential duty free import to Canada, goods must qualify under the rules of origin under the CETA

All Shipments from Europe are subject to:

- Standard import processing
- “Most Favoured Nation” / default rate of duty (unless they qualify as originating)
- Restrictions on specific categories including food, drugs and alcohol

Useful information on  from where goods ship versus their country of origin

Canada's Import Tariffs / Duty

Import Duty is primarily determined by three main factors

- HS Code / tariff classification
 - Country of Origin
- = % Duty

$\% \text{ Duty} \times \text{Value} = \text{Resulting duty assessment}$

* Note that duty is sometimes based on volume, weight or other measurements rather than value

Other Canadian Import Fees

- Federal and Provincial sales tax
- Entry Preparation and related Fees
- Carrier Disbursement Fee

Export Declaration

Export declarations are obligatory for goods exporting from the E.U.

In addition to the HS classification, the declaration also requires an EORI number. The HS classification for export may be different from the Canadian classification.

Shipping to Canada from France

Non-Resident Importer/ NRI

The NRI program allows European businesses to get a Canadian Business Number (BN). This is the most common way for foreign companies to import goods to Canada.

This program allows European companies to effectively operate as a Canadian company. It can simplify the import process.

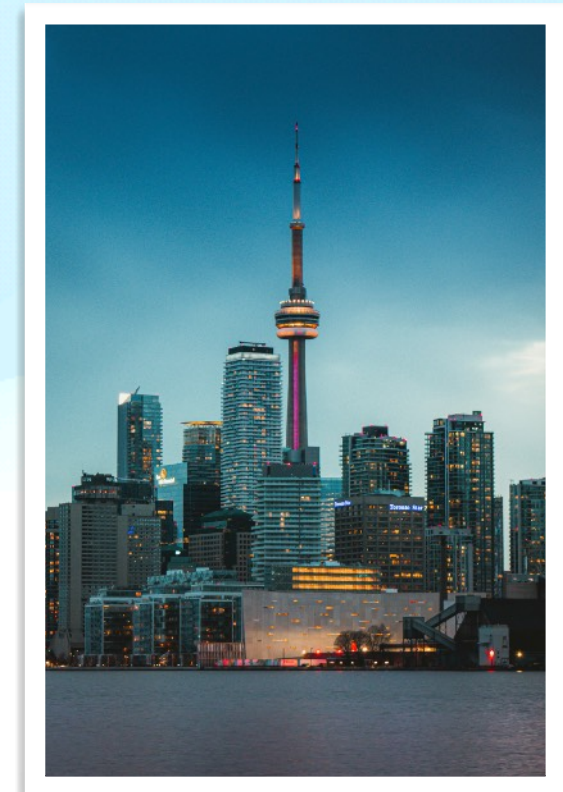

Become a non-resident importer and act as your own distributor to Canada and USA!

The requirements include record keeping, posting of a surety bond to benefit from customs release prior to payment of import fees, and reporting.

Note that different methods for determining the value for duty may be necessary for NRI imports.

Returns in Canada for European Companies

Return Solutions Canada to Europe

A necessary consideration when setting up export processes to a foreign country is management of returns.

- Refused deliveries
- Damaged goods
- Regular product returns
- Receive and reship

Jet Worldwide currently manages Amazon removal order, and return support for overseas companies. Goods ship back via economy air or LCL ocean.
