HS Codes

Taiwan HS codes versus Canadian HS codes

The main difference between HS codes in Taiwan and Canada lies in the additional digits. The first six digits are harmonized globally

Valuation / Value For Duty

Transaction Value

In the majority of the cases, the correct value to declare at export and import is the “transaction value.” The transaction value is the price paid - or payable - for the goods.

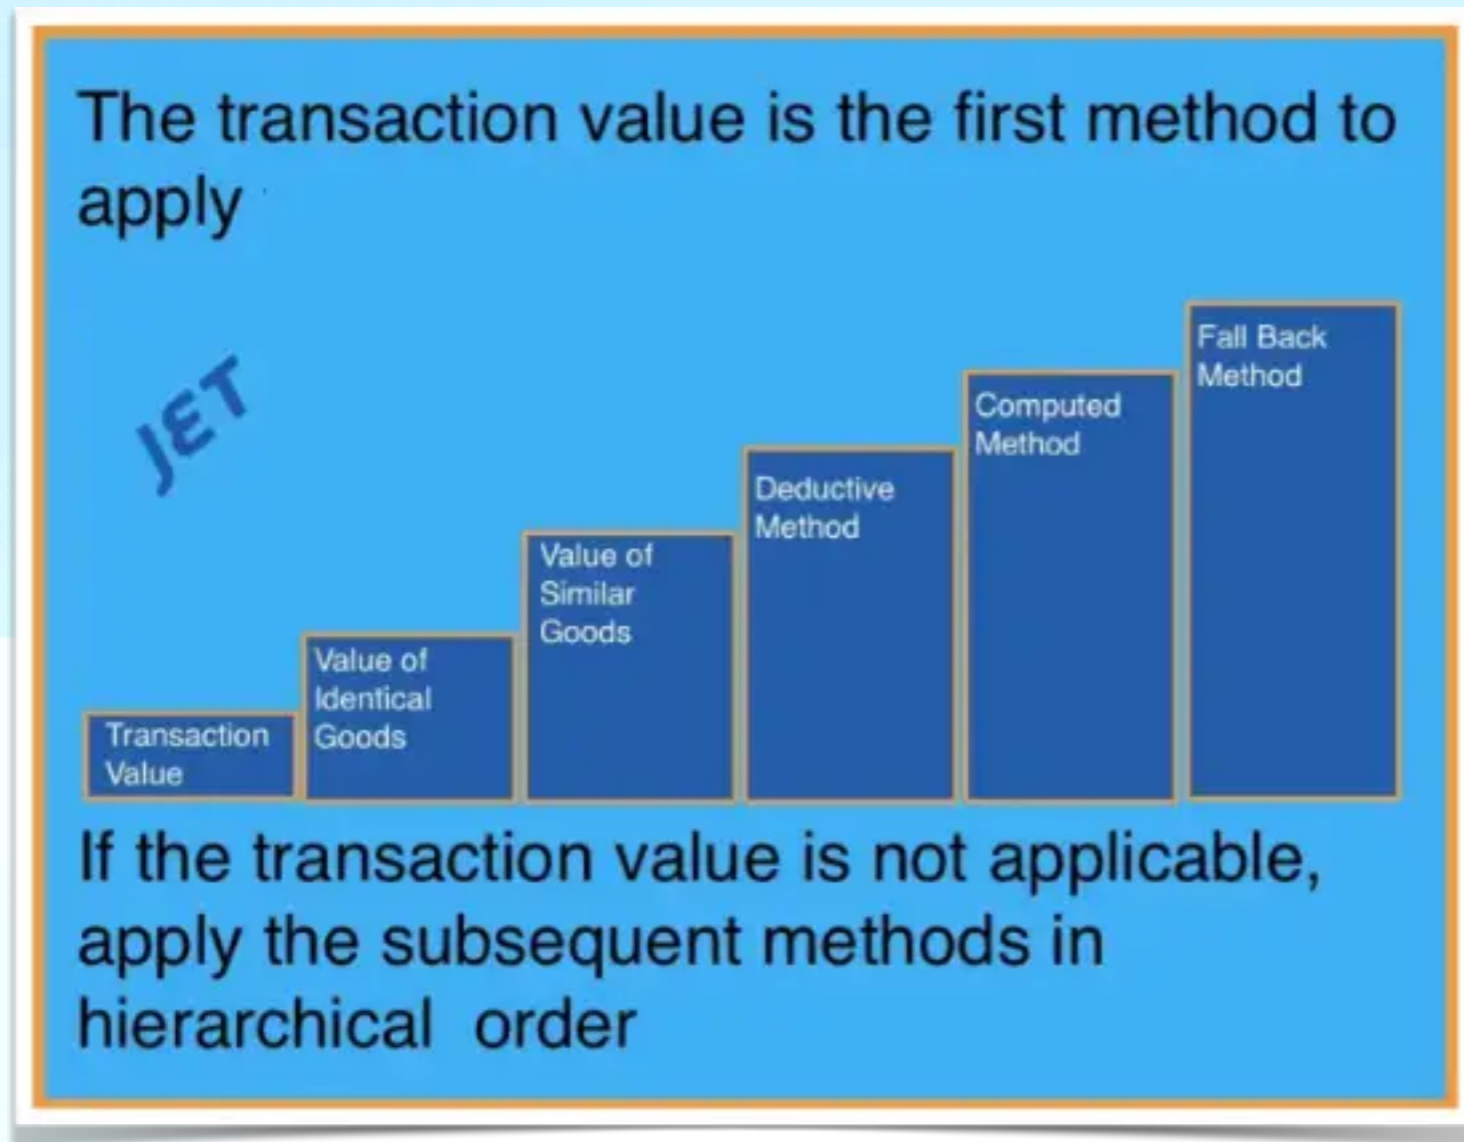

The cost of shipping and insurance is included as part of the transaction value (known as CIF value).

Shipping Taiwan to Canada

All Shipments from Taiwan are subject to:

- Standard import processing
- “Most Favoured Nation” / default rate of duty applies
- Restrictions on specific categories including food, drugs and alcohol

Common Import Duty Calculation

- HS Code / tariff classification
 - Country of Origin
- = % Duty

% Duty (x) Value = Canadian Import Fees

Canada’s Import Duty

* Note that duty is sometimes based on volume, weight or other measurements rather than value

Other Canadian Import Fees

- Federal and Provincial Sales Tax
- Entry Preparation and Related Fees
- Carrier Disbursement Fee

Non-Resident Importer/ NRI

The NRI program allows Taiwan businesses to get a Canadian Business Number (BN). This is the most common way for foreign companies to import goods to Canada.

This program allows Taiwan companies to act as their own distributor to Canada. It can simplify the import process. Large bulk imports can import via one customs entry for de-consolidation and distribution to multiple consignees.

The requirements include record keeping, posting of a surety bond to benefit from customs release prior to payment of import fees, and reporting.

Note: Different methods of valuation/ “value for duty” may apply
