PACKAGE AND FREIGHT

#### **UPS® FTZ Facilitator**

With UPS FTZ Facilitator service, importers and exporters have the ability to use UPS to transport international shipments in-bond to and from a global Free/Foreign Trade Zone (FTZ). This service is available for all UPS international shipments, except for UPS® Standard service.

This contractual, fee-based service allows the shipment of goods to and from an FTZ, while retaining the benefits of UPS's transportation network. Using UPS as a single source enables importers and exporters to increase visibility and tracking, and reduce the chance for errors and costs associated with utilizing multiple transportation providers.

UPS technology enables shipment information and documentation (e.g., the commercial invoice) available to the customer, customer's broker and FTZ operator at the time of export. This enables prompt processing of the FTZ entry. Importers will choose UPS FTZ Facilitator import service to direct shipments to be delivered in-bond to a designated FTZ rather than being cleared through customs.

Exporters will choose UPS FTZ Facilitator export service to ship goods in-bond from an FTZ to an international destination. Refer to page <u>195</u> for fees.
